☐ Altering Casing
☒ Other Temporarily Abandon
☐ Change of Plans
☐ New Construction
☐ Non-Routine Fracturing
☐ Water Shut-Off
☐ Conversion to Injection
☐ Dispose Water

(Note: Report results of multiple completion on Well Completion or Recompletion Report and Log form.)

13. Describe Proposed or Completed Operations (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)*

We request that this well be classified as Temporarily Abandoned. The South Red Lake Unit is an active waterflood project with potential for infill drilling and conversion of existing wells to additional water injection wells. This well has beneficial use as a producing well or a future water injection well. Depending upon the success of an infill drilling program this well could be reactivated in the future as a producing well or converted to a water injection well.

If this justification for temporary abandonment is deemed reasonable a casing integrity test will be scheduled during the month of August, 1994.
