It appears that the top joint of casing has been pulled from this well prior to our taking over the lease.

Our intention is to clean out to T. D. bailer test the producing zone, repair the casing and put well back on production.

If we do not get to T. D. or do not recover any oil, we will plug the hole, set dry hole marker and clean location.

Verbal approval to plug given on or about 10-21-78.

IN ADDITION TO THE PROPOSED PROGRAM: If proposal is to deepen or plug back, give data on present productive zone and proposed new productive zone. If proposal is to drill or deepen directionally, give pertinent data on subsurface locations and measured and true vertical depths. Give flow and pressure data, if any.
