SUNDRY NOTICES AND REPORTS ON WELLS

	SUBSEQUENT REPORT OF WATER SHUT-OFF
i	SUBSEQUENT REPORT OF SHOOTING OR ACIDIZING
-	SUBSEQUENT REPORT OF ALTERING CASING
-	SUBSEQUENT REPORT OF RE-DRILLING OR REPAIR
	SUBSEQUENT REPORT OF ABANDONMENT
-	Supplementary well History Notice of Intention to Deepen

(INDICATE ABOVE BY CHECK MARK NATURE OF REPORT, NOTICE, OR OTHER DATA)

	July 17 , 1958				
Harbold Well No. 8 is located	330 ft. from \mathbb{R}^{N} line and 990 ft. from \mathbb{R}^{E} line of sec	. 35			
NWINEINEI Sec. 35	17 South 27 East N.M.P.M.				
(1/4 Sec. and Sec. No.)	(Twp.) (Range) (Meridian)				
Red Lake	Eddy New Maxico				
(Field)	(County or Subdivision) (State or Territory)				

The elevation of the derrick floor above sea level is 3556 ft.

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

I propose to deepen this well from the present total depth of 1700' to approximately 2400', or a depth sufficient to test the Slaughter zone of the San Andres formation.

The well will be deepened with Rotary; the pay will probably be cored. If production is developed, $5 \, 1/2^n$ casing will be run to tetal depth, cemented with 100 sacks, and then perforated.

All casing will be run and cemented using methods approved by the U. S. Geological Survey.

_	nd that this plan of work must receive approval in writing		DEGETATION
I understar	nd that this plan of work must receive approval in writing	by the Geological Survey before operation	is may be commenced.
