13. Describe Proposed or Completed Operation (clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration thereof). If the proposal is to deepen directionally or recomplete horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and lateral. Attach the Bond under which the work will be performed or provide the Bond No. on file with BLM/BIA. Required subsequent reports shall be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recompletion in a new interval, a Form 3160-4 shall be filed once testing has been completed. Final Abandonment Notices shall be filed only after all requirements, including reclamation, have been completed and the operator has determined that the well is ready for final inspection.

After a failed attempt to reenter and place this well on production, McQuadrangle plans to plug the well from the surface using 5 sxs per yard of rathole mix concrete as authorized by Alexes Swaboda. A total depth of 120' was reached after numerous attempts to repair 7" casing. McQuadrangle will start w/8 yards of concrete and will continue until cement fills to surface. Work should begin the week of 7/1/02.

14. I hereby certify that the foregoing is true and correct.
