NEW MEXICO OIL CONSERVATION COMMISSION GAS-OIL RATIO TESTS

C-116 Revised 1-1-65

Report casing pressure in flew of tubing pressure for any well producing through casing. Mall original and one copy of this report to the district office of the New Mexico Oli Conservation Commission in accordance with Rule 301 and appropriate pool rules.	During gas-oil railo test, each well shall be produced at a rate not exceeding the top unit allowable for the pool in which well in located by more than 25 percent. Operator is encouraged to take advantage of this 25 percent tolerance in order that well can be assigned increased allowables when authorized by the Commission. Gas volumes must be reported in MCF measured at a pressure base of 15.025 psic and a temperature of 60° F. Specific gravity base will be 0.60.	No well will be exeigned an allowable greater than the amount of oll produced on the official test.		THIS TEST BEING SUBMITTED	Magruder M	LEASE NAME	1919, Midland,	r 25 Service Oil & Gas
