DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

This is to advise you the above well's location was moved 53 feet North of the original staked location.

Before drilling this well it was discovered that a pipe line ran under where the rotary rig would be and the location was moved to clear this obstacle.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
