the  $\beta$  phase of the polymer. The  $\beta$  phase is the more ordered phase and is characterized by a higher density and a higher melting point than the  $\alpha$  phase. The  $\beta$  phase is the more stable phase and is the one that is most commonly observed in nature. The  $\alpha$  phase is the less ordered phase and is characterized by a lower density and a lower melting point than the  $\beta$  phase. The  $\alpha$  phase is the less stable phase and is the one that is most commonly observed in nature.

Figure 1 consists of four panels labeled (a) through (d), each showing a schematic of a subject in a room with a screen and a speaker. Panel (a) is labeled 'Pretest' and shows a subject looking at a screen with a speaker below it. Panel (b) is labeled 'Training' and shows a subject looking at a screen with a speaker below it. Panel (c) is labeled 'Test' and shows a subject looking at a screen with a speaker below it. Panel (d) is labeled 'Posttest' and shows a subject looking at a screen with a speaker below it. The panels are arranged in a horizontal sequence from left to right.
