18. Abstract

19. Keywords

Abstract: This study examines the impact of social media on consumer behavior. The research was conducted using a mixed-methods approach, combining quantitative data from a survey of 500 participants with qualitative data from focus group discussions. The results indicate that social media significantly influences purchasing decisions, particularly in the areas of product discovery and brand loyalty. However, the impact varies across different demographic groups. The study also identifies several challenges associated with social media marketing, such as information overload and privacy concerns. These findings have important implications for marketers and researchers alike.
