NOTICE OF INTENTION TO DRILL

Notice must be given to the Oil Conservation Commission or its proper agent and approval obtained before drilling begins. If changes in the proposed plan are considered advisable a copy of this notice showing such changes will be returned to the sender. Submit this notice in triplicate. One copy will be returned following approval. See additional instruction in Rules and Regulations of the Commission.

Artesia, New Mexico.

January 16, 1948.

Place

Date

OIL CONSERVATION COMMISSION.
Santa Fe, New Mexico.

Gentlemen:

You are hereby notified that it is our intention to commence the drilling of a well to be known as

Martin Yates, III **William P. Dooley** Well No. **2** in **NW 1/4 NW 1/4 SE 1/4**

Company or Operator **Empire** Lease **Empire** Field, **Edgy** County
of Sec. **36**, T. **17 S.**, R. **27 E.**, N. M. P. M., **Empire**

N.

The well is **2300** feet (N.) (**S**) of the **S** line and **2300** feet
1/4 (W.) of the **E** line of **Sec. 36, T. 17 S., R. 27 E.**

(Give location from section or other legal subdivision lines. Cross out wrong directions)

If state land the oil and gas lease is No. **B-752** Assignment No. _____

If patented land the owner is _____

Address _____

If government land the permittee is _____

Address _____

The lessee is **William P. Dooley**Address **Artesia, N. Mex.**

AREA 640 ACRES
LOCATE WELL CORRECTLY

We propose to drill well with drilling equipment as follows: **Cable tools****to total depth of approximately 1700 feet.**

The status of a bond for this well in conformance with Rule 39 of the General Rules and Regulations of the Commission is as follows: **\$10,000 Blanket Bond filed with the State of New Mexico by**

Martin Yates, III
We propose to use the following strings of casing and to land or cement them as indicated:

Size of Hole	Size of Casing	Weight Per Foot	New or Second Hand	Depth	Landed or Cemented	Sacks Cement
	8"			Approximately 900'		
	7"			Approximately 1500 feet, for use as production string.		
				Production string cemented with 50 sacks cement.		

If changes in the above plan become advisable we will notify you before cementing or landing casing. We estimate that the first productive oil and gas sand should occur at a depth of about **1700'** feet.

Additional information:

Approved 1-19, 1948
except as follows:

Sincerely yours,

MARTIN YATES, III

By Martin Yates III
Company or Operator

Position **Operator.**

Send communications regarding well to

Name **Martin Yates, III.**Address **Box 397, Artesia, N. Mex.**

10-10-1964

1. The first step in the process of identifying a problem is to define the problem. This involves identifying the symptoms of the problem and determining the scope of the problem. Once the problem has been defined, the next step is to identify the causes of the problem. This involves identifying the factors that are contributing to the problem and determining the underlying causes of the problem. Once the causes of the problem have been identified, the next step is to develop a plan to address the problem. This involves identifying the actions that need to be taken to address the problem and determining the resources that will be needed to implement the plan. Once a plan has been developed, the next step is to implement the plan. This involves taking the actions that have been identified in the plan and putting them into practice. Finally, the last step in the process is to evaluate the results of the plan. This involves determining whether the plan has been successful in addressing the problem and identifying any areas for improvement.

1. The first of these is the fact that the Government has not yet been able to secure a satisfactory arrangement for the disposal of the surplus stocks of the various commodities which are now being accumulated in the various ports and warehouses. This is a serious problem, and it is one which the Government must be able to solve if it is to maintain the confidence of the public in its financial policy.
