DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

I desire to drill approximately 500 feet with cable tools, unless oil is encountered at lesser depth, to set 7" pipe approximately 420 feet for oil string, cement with 50 sacks cement by Halliburton, as there will not be sufficient water encountered to have a surface or water string of pipe.
