	DETAILS OF WORK	
State names of and expected depths to ob	bjective sands; show sizes, weights, and lengths of proposed ing points, and all other important proposed work)	
State names of and expected depths to ob Intention to drill opth of 5,000 foot unles a losser depth. We ex- carface pipe, approxim- to of 7" contar and api	bjective sands; show sizes, weights, and lengths of proposed ing points, and all other important proposed work) a test well at the above location is Cil or Gas is encountered in e upset to run approximately 400 for mately 500 foot of 8 5/0" casing, proximately 2,200 foot of 8 1/2"	a to an approximate
State names of and expected depths to ob Intention to drill pth of 5,000 foot unles a losser depth. We ex- curface pipe, approxim- to of 7° contar and app	bjective sands; show sizes, weights, and lengths of proposed ing points, and all other important proposed work) a test well at the above location is Cil or Gas is encountered in a	a to an approximate
State names of and expected depths to ob Intention to drill pth of 5,000 foot unles a losser depth. We ex- curface pipe, approxim- th of 7° contart and app	bjective sands; show sizes, weights, and lengths of proposed ing points, and all other important proposed work) a test well at the above location is Cil or Gas is encountered in e upset to run approximately 400 for mately 500 foot of 8 5/0" casing, proximately 2,200 foot of 8 1/2"	a to an approximate compresal quantizes et of 10 3/4" seein g approximately 1,800 eacing for an ell
State names of and expected depths to ob Intention to drill pth of 5,000 foot unles a losser depth. We ex- curface pipe, approxim- to of 7" contart and app	bjective sands; show sizes, weights, and lengths of proposed ing points, and all other important proposed work) a test well at the above location is Cil or Gas is encountered in e upset to run approximately 400 for mately 500 foot of 8 5/0" casing, proximately 2,200 foot of 8 1/2"	a to an approximate
State names of and expected depths to ob Intention to drill pth of 5,000 foot unles a losser depth. We ex- curface pipe, approxim- th of 7° contart and app	bjective sands; show sizes, weights, and lengths of proposed ing points, and all other important proposed work) a test well at the above location is Cil or Gas is encountered in e upset to run approximately 400 for mately 500 foot of 8 5/0" casing, proximately 2,200 foot of 8 1/2"	a to an approximate compresal quantizes et of 10 3/4" seein g approximately 1,800 eacing for an ell
State names of and expected depths to ob Intention to drill opth of 5,000 foot unles a losser depth. We ex- carface pipe, approxim- to of 7" contar and app	bjective sands; show sizes, weights, and lengths of proposed ing points, and all other important proposed work) a test well at the above location is Cil or Gas is encountered in e upset to run approximately 400 for mately 500 foot of 8 5/0" casing, proximately 2,200 foot of 8 1/2"	a to an approximate compresal quantizes et of 10 3/4" seein g approximately 1,800 eacing for an ell
State names of and expected depths to ob Intention to drill opth of 5,000 foot unles a losser depth. We ex- carface pipe, approxim- to of 7" contar and api	bjective sands; show sizes, weights, and lengths of proposed ing points, and all other important proposed work) a test well at the above location is Cil or Gas is encountered in e upset to run approximately 400 for mately 500 foot of 8 5/0" casing, proximately 2,200 foot of 8 1/2"	a to an approximate compresal quantizes et of 10 3/4" seein g approximately 1,800 eacing for an ell
State names of and expected depths to ob Intention to drill opth of 3,000 foot unless a losser depth. We ex- s curface pipe, approxim- not of 7° casing and spi- bring and coment same wi	bjective sands; show sizes, weights, and lengths of proposed ing points, and all other important proposed work) a test well at the above location is Cil or Gae is encountered in e spect to run approximately 400 fe mately 800 feet of 8 5/0" casing, proximately 3,200 feet of 8 1/1" ith 100 encks of coment.	a to an approximate compressing quantities of of 10 3/4" seein g approximately 1,800 seeing for an ell
State names of and expected depths to ob Intention te drill opth of 3,000 foot unles a losser depth. We ex- courface pipe, approxim- net of 7° casing and opposite bring and compat same with	bjective sands; show sizes, weights, and lengths of proposed ing points, and all other important proposed work) a test well at the above location is Cil or Gae is encountered in e spect to run approximately 400 fe ately 800 feet of 8 5/0" casing, proximately 8,200 feet of 8 1/1" ith 100 eacks of coment.	a to an approximate compressing quantities of of 10 3/4" seein g approximately 1,800 seeing for an ell
State names of and expected depths to ob Intention te drill opth of 3,000 foot unles a losser depth. We ex- curface pipe, approxim- net of 7° casing and opposite bring and compat same with	bjective sands; show sizes, weights, and lengths of proposed ing points, and all other important proposed work) a test well at the above location is Cil or Gae is encountered in e spect to run approximately 400 fe ately 800 feet of 8 5/0" casing, proximately 8,200 feet of 8 1/1" ith 100 eacks of coment.	a to an approximate compressing quantities of of 10 3/4" seein g approximately 1,800 seeing for an ell
State names of and expected depths to ob Intention te drill opth of 3,000 foot unles a losser depth. We ex- curface pipe, approxim- net of 7° casing and opposite bring and compat same with	bjective sands; show sizes, weights, and lengths of proposed ing points, and all other important proposed work) a test well at the above location is Cil or Gae is encountered in e spect to run approximately 400 fe ately 800 feet of 8 5/0" casing, proximately 8,200 feet of 8 1/1" ith 100 eacks of coment.	to an approximate compressing quantities of of 10 3/4" seein g approximately 1,800 ensing for an ell
(State names of and expected depths to ob Intention to drill opth of 5,000 foot unless a losser depth. We ex- be surface pipe, approxim- ort of 7° casing and spi- bring and company and spi- lunderstand that this plan of work m Company Kineaid & W	bjective sands; show sizes, weights, and lengths of proposed ing points, and all other important proposed work) a test well at the above location is Cil or Gae is encountered in e spect to run approximately 400 fe ately 800 feet of 8 5/0" casing, proximately 8,200 feet of 8 1/1" ith 100 eacks of coment.	to an approximate compressing quantities of of 10 3/4" seein g approximately 1,800 ensing for an ell
(State names of and expected depths to ob Intention to drill opth of 3,000 foot unloss a losser depth. We ex- sering and company and spin- bring and compant same with I understand that this plan of work m Company Eineaid & W Address Pax 536	bjective sands; show sizes, weights, and lengths of proposed ing points, and all other important proposed work) a test well at the above location is Cil or Gas is encountered in e spect to run approximately 400 for atoly 300 foot of 8 5/6" casing, proximately 2,200 foot of 8 1/1" ith 100 encks of sement.	to an approximate compression quantities of of 10 3/4" seein g approximately 1,800 easing for an ell
State names of and expected depths to ob Intention to drill opth of 3,000 foot unless a lesser depth. We ex- sering and company and spin- bring and company and spin- lunderstand that this plan of work m Company Kineaid & W	bjective sands; show sizes, weights, and lengths of proposed ing points, and all other important proposed work) a test well at the above location is Cil or Gas is encountered in e spect to run approximately 400 for atoly 300 foot of 8 5/6" casing, proximately 2,200 foot of 8 1/1" ith 100 encks of sement.	to an approximate compressing quantities of of 10 3/4" seein g approximately 1,800 ensing for an ell
State names of and expected depths to ob Intention to drill opth of 3,000 foot unloss a losser depth. We ex- carface pipe, approxim- ot of 7" casing and e.p. bring and compart same with Lunderstand that this plan of work m Company Kineaid & W Address Bax 536	bjective sands; show sizes, weights, and lengths of proposed ing points, and all other important proposed work) a test well at the above location is Cil or Gas is encountered in e spect to run approximately 400 for atoly 300 foot of 8 5/6" casing, proximately 2,200 foot of 8 1/1" ith 100 encks of sement.	to an approximate compression quantities of of 10 3/4" seein g approximately 1,800 easing for an ell
