DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

We propose to drill a well to test the \_\_\_\_\_ formation and not to exceed a depth of 1000 feet.

We propose the following casing program:

10 2/3" set at approx. 135 feet to shut off surface water  
8 1/2" set at approx. 100 feet and cemented with 50 sacks.  
7" set through oil sand, if needed, at approx. 1200 feet  
to be pulled  
5 1/2" oil casing to be cemented with 100 sacks, if we get  
production.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
