

~~11/15/77~~ ~~Activity~~

Ogrid - 36990
prop - 14072
pool - 51340

Initial injection shall be through the four authorized
water injection wells, each of which shall be equipped with a
string of plastic-coated tubing set in a packer. Packers shall
be located as close as practicable to the uppermost perforation.
The casing-tubing annulus of each injection well shall be loaded
with an inert fluid and shall be equipped with a pressure gauge
at the surface.
