We plan to set 5 sacks cement plug at total depth 2143 and fill with mud to bottom of 7" casing at 1916 and set second cement plug of 5 sacks. Will knock off 7" casing at approximately 1000' then pull same. Then fill with mud to bottom of 8 1/2" casing at 381 and set third cement plug of 5 sacks. Will knock off 8 1/2" casing at approximately 190' and pull same. Fill hole with mud to surface and set regulation marker.

The reason for the abandonment of this well is that it is no longer a commercial producer.
