#### DETAILED ACCOUNT OF WORK DONE AND RESULTS OBTAINED

Permission was given to land a 5/8 casing at about 1400 ft.

We thought we had some gas at 1378-1388 after drilling hole to 1376. We were carrying a hole full of water (about 1000 ft.) obtained in the red sand at 1320-1335. In order to test this gas we run a disc wall packer on the 5/8 at 1357 1/2 ft. This packer was set in hard line and the pipe was suspended by clamps.

We found no gas after bailing the hole dry and suppose that that gas we found was coming from the red sand and along with the water, as we had no indications of it until after we got salt water in the red sand. We got a perfect shut off and are drilling ahead at 1400 ft.
