

Artesia N.M. June 17 1935.

Mr. F.J. Vesley,
State Oil and Gas Ins.
Carlsbad,
N.M.

Dear Sir;

Inclosed please find a complete report on the well that I just drilled in Sec. 2 T. 17 R 28 .

We got no indications of oil at all but developed considerable gas below 1500 ft. We cased this well and are allowing it to stand with the intention of drilling another well at a later date to supply gas to theecos Valley Gas Co.

We could go no further with the rig that we were using and intend to set another rig over this hole later and drill to 2400 or 2500 ft. with a view of reaching the Greensburg sand.

Yours very truly,

Fred Brainerd
