13. Describe Proposed or Completed Operations (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)*

After reviewing drilling and treating records on this well, I believe that there is an excellent chance that a significant amount of oil might be recovered. Since there is an apparent oil shortage in the well, it seems unconscionable to plug this well without making a diligent effort to re-establish production.

I have made arrangements to move a rig on the well to clean out the well bore to the T.D. of 1618 and test the oil zone that is under sand and sediment. If this proves unsuccessful, we will commence with the approved plugging plan.

The rig will be on location no later than Oct. 9, 2000

14. I hereby certify that the foregoing is true and correct
