Well No. 2 is located 830 ft. from N line and 800 ft. from E line of sec. 18
178 80E T. 1N. R. 8E.
 (Twp.) (Range) (Meridian)
Regina Elddy New Mexico
 (Field) (County or Subdivision) (State or Territory)

The elevation of the derrick floor above sea level is _____ ft.

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

In conformity with details expressed in original application, I am now planning the setting of IX 7" casing and the setting point will be at approximately 824' from surface - plan to use 25 sack oil well cement, but will pull 8" water string just after setting 7" on bottom and before Cement is run - Halliburton service used.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.

Company A.H. Eyer, Independent
