The elevation of the derrick floor above sea level is \_\_\_\_\_ ft.

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudlogging jobs, cementing points, and all other important proposed work.)

We plugged back to 440 feet and set a 15-sack cement plug. We then knocked the casing off at approximately 225 feet from the surface and cemented with 5 sacks of cement. We then filled the hole to the surface and cemented a marker.
