DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

We plan to drill this well to an approximate depth of 3300' with company cable tools. We will set approximately 600' of 8-5/8" casing, then drill to total depth and set 5-1/2" casing, run electric logs, perforate and treat.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
