17. DESCRIBE PROPOSED OR COMPLETED OPERATIONS. (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.) *

Well was TA for several years prior to 1985. Well was returned to production about November, 1985 and pumped for about 1 year. Production was about 0.5 BOPD and 3 BWPD. We cannot foresee the well being economically feasible unless oil prices increase to the \$30-35 per barrel range. Propose to TA the well for a period of 1 year and then P & A unless oil prices are in a range to make the well economical. Equipment has been removed from the well and a valve placed at the surface.
