8-12-80

Plans are to cover perms at 2130-2136 with sand up to 2,025 feet and dump 35 feet of cement on top of sand with dump bailer. Let cement set 24 hours and perforate 4 1/2 inch casing from 1922-1936 in the Premier Sand. Spot acid to break down. If oil is shown we intend to sand frac zone with sand and jelled water.

18. I hereby certify that the information above is true and complete to the best of my knowledge and belief.
