Hobbs, New Mexico

Gentlemen:

February 24, 1953, a survey was made to stake your State ~~AB~~ lease, Well No. 1, in the E1/4 Sec. 29, Twp. 17 South, Range 28 East, N.M.I.U., Elbert County, New Mexico.

A flag was set at the east quarter corner and southeast corner of section 29 and the transit was sighted in between the two points. The survey was started at the southeast corner and chained north along the east boundary of the section a distance of 1980.0 feet, thence west 1980.0 feet to the location. To check we turned southeast $45^{\circ} 00'$ for a perfect angular closure. The chained distance back to the southeast corner was 1867.3 feet for an error of 0.3 feet.

This township was originally surveyed and the markers were lost, then in 1941 the U.S.N.I.O. made a dependent resurvey and placed brass markers at the location that they assumed the original markers to be. The old original surveys were quite inaccurate and for this reason the brass markers are quite often more or less than 240.0 between. We were aware of this condition and chained the east side. The location is only 618.3 feet south of the north line of the south half of the section.

I hereby certify that the foregoing survey was made in the field by me and that the same is true and correct to the best of my knowledge and belief.

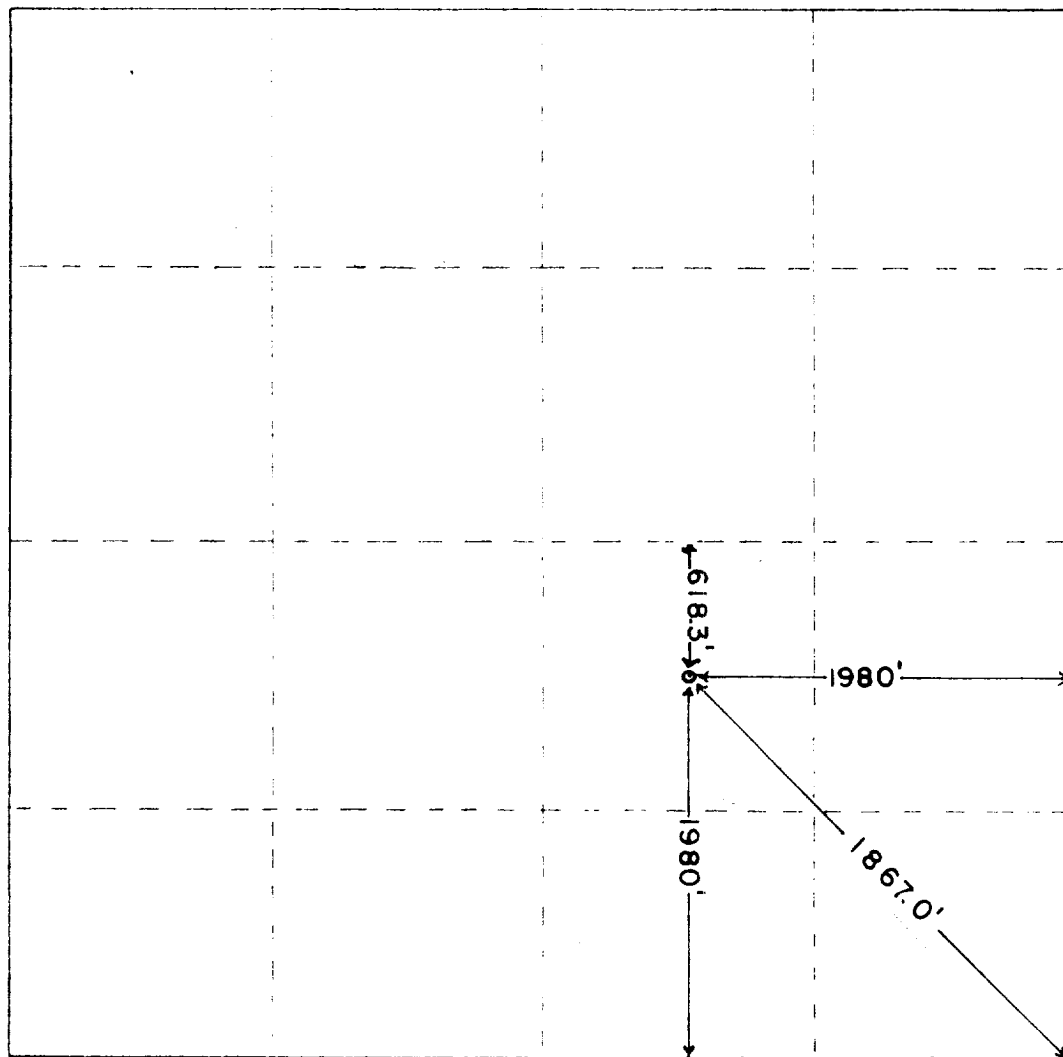

Respectfully submitted,

John W. West
