Detailed account of work done, nature and quantity of materials used and results obtained.

After filing Form C-101 "Notice of Intention to Drill", we requested and received, via telephone on December 3, 1962, verbal approval from Mr. Armstrong of the Oil Conservation Commission to amend our casing program so as to run 8 5/8" casing to an approximate depth of 950 feet and set with mud to shut-off water zone encountered in some wells in the general area and after running 7" casing to total depth, to pull the 8 5/8" casing and then circulate cement.

Water was encountered from 940 feet to 980 feet and on December 11, 1962 the 8 5/8" surface casing was set at 991 feet, mudded and water shut-off. On December 23, 1962 ran 1944 feet of 7" casing and circulated 350 sacks of Reg. Neat cement to within 400 feet of surface. 8 5/8" casing pulled as planned.
