205 CARPER BUILDING

ARTESIA, NEW MEXICO

January 8, 1954

Mr. Ralph L. Hendrickson  
% Stanolind Oil & Gas Co.  
P. O. Box 68  
Hobbs, New Mexico

Dear Sir:

We have received Form C-101 Notice of Intention to Drill the Stanolind Oil & Gas Company, State AE, Well No. 1 990 feet from North line and 1650 feet from west line of Section 32-17S-28E, Empire-Pennsylvanian Pool, Eddy County, New Mexico.

Since you submitted only five copies of this form, and six copies are required for wells drilled on State Land, we have typed an extra copy for your files, you will note that I have made an exception on Form C-101 in regard to cementing of the 9-5/8" Intermediate string of casing, whereby it will conform with Oil Conservation Commission Temporary Order No. R-391, Section C, paragraph b, and I quote:

"The intermediate string of casing shall be set through the shallow oil producing beds in the area, and in no event, shall be set higher than the top of the San Andres formation and a sufficient amount of cement used to circulate the cement to the base of the surface casing."

Also the cement back of the production string must circulate to a point above the top of the Wolfcamp producing formation encountered in the area.

Yours truly,

OIL CONSERVATION COMMISSION

205 CARPENTER BUILDING

ARTESIA, NEW MEXICO

January 8, 1934

Mr. Ralph L. ...  
Station ...  
Box ...  
New Mexico

I have received Form O-100, notice of ...  
Oil & Gas Company, State No. 1 990 feet from ...  
from west line of Section 32-178-283, ...  
New Mexico.

Since you submitted only five copies of this form, and six copies are  
required for wells drilled on State land, we have typed an extra copy for you.  
Also, you will note that I have made an exception to Form O-100 in regard to  
completion of the 9-5/8" intermediate string of casing, whereby I will continue  
with Oil Conservation Commission Temporary Order No. 9-5/8", Section 32-178-283, ...  
and I quote:

"The intermediate string of casing shall be run through the  
existing oil producing beds in the area, and in no event  
shall be set higher than the top of the ... formation  
and a sufficient amount of cement used to stimulate the ...  
to the base of the surface casing."

Also the cement back of the production casing was ...  
above the top of the ... producing formation encountered in the well.

Very truly,  
Yours,

Oil Conservation Commission

W. L. ...  
Oil & Gas Inspector
