This well has developed pressure and a salt water flow on the 4½" X 8-5/8" annulus. To protect the 4½" casing we propose to perforate 4 holes about 30' above top of cement at approx. 2350' & cement w/600 sx of Class C. This should circulate to the surface.

18. I hereby certify that the information above is true and complete to the best of my knowledge and belief.
