DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

On September 1, 1956, we ran 350' of 10 3/4" OD 32.75# 8rd thrd. new seamless H-40 casing to 355' and cemented with 50 sax Alamo cement. After allowing to stand cemented for 72 hours, we bailed hole down, drilled plug and re-ran bailer. As shut-off proved complete drilling was resumed. Cementing was done by Denton Oil Well Cementing Co.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
