Len Mayer (Formerly #1 McBrath-Hinkle) March 3, 1963

Well No. 1 is located 2310 ft. from $\begin{Bmatrix} N \\ S \end{Bmatrix}$ line and 770 ft. from $\begin{Bmatrix} E \\ W \end{Bmatrix}$ line of sec. 4Lot 5 Sec. 4
($\frac{1}{4}$ Sec. and Sec. No.)16-S
(Twp.)29-E
(Range)NMPM
(Meridian)Wildcat
(Field)Eddy
(County or Subdivision)New Mexico
(State or Territory)

The elevation of the derrick floor above sea level is 3713 ft.

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

As per verbal instructions given on this date by Mr. Knauf, It is my plan to plug and abandon this well in the following manner: 100' cement plugs will be placed at the following depths: At the bottom of the hole, at 1530', 700', 300' and a 20' cement plug at the surface. A marker will be placed as per regulations. These plugs will cover the water zone at TD, the Queen sand, base of salt and the top of salt, and surface. 140' of 12 3/4" pipe was pulled.

Heavy mud will be placed between cement plugs.
This well is being plugged due to the difficulty encountered in drilling by increasing water in hole and constant sluffing and caving of the formation.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
