No well will be easigned an allowable greater than the amount of all produced on the official test.

During gas-oil ratio test, each well shall be produced at a rate not exceeding the top unit allowable for the pool in which well tallocated by more than 25 percent. Operator is encouraged to take advantage of this 25 percent tolerance in order that well can be assigned increased allowables when authorized by the Division.

Gas volumes must be reported in MCF measured at a pressure base of 15,025 psic and a temperature of 60° F. Specific gravity base

Report cooling pressure in lieu of tubing pressure for any well producing through casing.

Mail original and one copy of this report to the district office of the New Mexico Oli Conservation Division in accordance with Called 331 and appropriate pool rules.

is true and complete to the best of my knowledge and bolief. I hereby certify that the above information
