DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

On July 31, 1959 we ran 2057' of 7" OD 8rd third 20# mixed new and used JS casing to 260' and cemented with 150 sacks neat cement.

After standing cemented 72 hours, we drilled plug, bailed hole down and re-ran bailer. As shut-off proved complete drilling was resumed.

Cementing was done by Barton Oil Well Cementing Company.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
