Shut-in Status

(Note: Report results of multiple completion on Well Completion or Steerable Completion Report and Log form.)

17. I hereby certify that the foregoing is true and correct. (This space for Federal or State office use.)

This well is still in an active waterflood unit and we are studying the possibility of infill drilling. We request additional shut-in time on this well as it may be used for production or injection at a later date.

Well was shut in February, 1967 for operational or mechanical reasons.

After feasibility studies are completed work should be commenced within the next two years.
