Loce Mills, New Mexico January 26, 19 60

Well No. 4 is located 990 ft. from N line and 990 ft. from E line of sec. 14
NW SE SE Sec. 14 16-S 29-E N.M.P.M.
($\frac{1}{4}$ Sec. and Sec. No.) (Twp.) (Range) (Meridian)
High Lonesome Eddy New Mexico
(Field) (County or Subdivision) (State or Territory)

The elevation of the derrick floor above sea level is 3719 ft.

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

On January 15, 1960 we ran 2047' of 5 1/2" OD 8rd third 14' new JS Casing to 2050' and cemented with 150 sacks neat cement.

After standing cemented for 72 hours, we drilled plug, bailed hole down and re-ran bailer. As shut-off proved complete, drilling was resumed.

After fracturing well, we pulled 10 3/4" casing loose and spotted 50 sacks neat cement above top of salt section.

Cementing was done by Denton Oil Well Cementing Company.
