DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

On August 21, 1958, we ran 2050' of 7" OD #23 # JS used casing to 2061' & cemented with 150 sacks neat cement.

After standing cemented 72 hours, we tested casing with 3300 psig at surface. We then drilled plug, bailed hole dry, and re-ran bailer. As shut-off proved complete, drilling was resumed.

Cementing & pressure testing was done by Denton Oil Well Cementing Company.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
