DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

On November 19, 1958, we ran 2052' of 7" OD 8rd thrd 23# used JS Casing to 2055' and cemented with 150 sacks cement preceded by 75 barrels Aquagel. After standing cemented 72 hours we pressured up on casing to 2700 psig. Held pressure OK. We then drilled plug, bailed hole down and re-ran bailer. As shut-off proved complete, drilling was resumed. Cementing and pressure testing was done by Denton Oil Well Cementing Company.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
