The elevation of the derrick floor above sea level is 3708 ft.

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudlogging jobs, cementing points, and all other important proposed work)

On July 2, 1959 we ran 1990' of 7" OD 8rd thrd 23# used JS casing to 1993' and cemented with 150 sacks.

After standing cemented for 72 hours we pressured up on casing to 3000 psig. We then drilled plug, bailed hole down and re-ran bailer. As shut-off proved complete drilling was resumed.

Cementing and pressure testing was done by Denton Oil Well Cementing Co.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.

Company GENERAL AMERICAN OIL COMPANY OF TEXAS
