Loco Hills, New Mexico November 23, 1959Well No. 23 is located 640 ft. from N line and 1980 ft. from E line of sec. 14SE 1/4 Sec. 14
(1/4 Sec. and Sec. No.)16-S
(Twp.)29-E
(Range)N. 31. P. M.
(Meridian)High Laneome
(Field)Eddy
(County or Subdivision)New Mexico
(State or Territory)The elevation of the derrick floor above sea level is 3704 ft.

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

On November 13, 1959 we ran 2022' of 7" CD 8rd thrd mixed 20# & 23# new & used JS casing to 2024' and cemented with 150 sacks cement.

After allowing to stand cemented for 72 hours we pressured up on casing to 3000 psig. We then drilled plug, bailed hole down and re-ran bailer. As shut-off proved complete drilling was resumed.

After fracturing well we pulled 10 3/4" casing loose and spotted 50 sacks cement from 382 to 272.

Cementing and pressure testing was done by Denton Oil Well Cementing Co.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
