1. The first part of the document is a letter from the President of the United States to the Congress, dated January 1, 1861. It is a formal address, and it is the first of its kind since the signing of the Constitution. The President, James Buchanan, is addressing the Congress, and he is doing so in a very formal and dignified manner. He is discussing the state of the Union, and he is also discussing the issue of slavery. He is saying that the Union is in a state of crisis, and that he is doing everything in his power to maintain it. He is also saying that he is not going to allow the Union to be divided over the issue of slavery.

1. The first part of the document is a letter from the author to the editor, dated 1954. The letter discusses the author's interest in the subject of the book and the author's intention to write a book on the subject. The letter is signed by the author, J. H. van der Hoff, and is dated 1954.

It is of the greatest importance to have a complete history of the well. Please state in detail the dates of redrilling, together with the reasons for the work and its results. If there were any changes made in the casing, state fully, and if any casing was "sidetracked" or left in the well, give its size and location. If the well has been dynamited, give date, size, position, and number of shots. If plugs or bridges were put in to test for water, state kind of material used, position, and results of pumping or balling.
