Completion or Recompletion Report and Log form.)

17. DESCRIBE PROPOSED OR COMPLETED OPERATIONS (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)*

Well shut in July, 1971, due to high offset water production in producing well. Plan to maintain well in shut in status until completion of secondary recovery project pending additional possible use as an injector. Probably any future need for this well would be within the next two years or plugging operations would be commenced.
