17. DESCRIBE PROPOSED OR COMPLETED OPERATIONS (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)*

Plan to run 2 3/8" tubing and set packer to pressure up casing and test well on June 15, 1986. Plan to repair and test well to attempt to change to producing status. If well is evaluated as being capable of producing oil in commercial quantities, then the necessary equipment will be set and paper work will be completed. However, if well is evaluated as not being repairable, then well will be plugged according to regulations and a dry hole marker will then be set.
