Re: Fed. Simmons Well No.1  
Unit G, Sec. 24-16-29

Dear Mr. McClellan:

The subject well has had no allowable since February of this year as the result of failure to file Form C-116 "Gas-Oil Ratio Report" for the annual GOR test which was taken in the West Henshaw Grayburg Pool during January 1962. We have one GOR Report only for this well, said test taken October 16, 1961.

Notification of the time of testing and the date for reporting was made on the "District II Gas-Oil Ratio Test Schedule" distributed early this year and on the January and February 1962 Proration Schedule. Further, the wells lack of any allowable has been noted in each District II Proration Schedule from March through June of 1962.

No allowable will be assigned this well until such GOR report is received in this office. Please send this office a copy of the chart and the tank gaugings, these will be returned to you if you so request.

Very truly yours,

OIL CONSERVATION COMMISSION
