Simmons Federal

Well No. 1 is located 330 ft. from N line and 990 ft. from W line of sec. 25SW SW 25
($\frac{1}{4}$ Sec. and Sec. No.)16S
(Twp.)29E
(Range)N.M.P.M.
(Meridian)Square Lake
(Field)Eddy
(County or Subdivision)New Mexico
(State or Territory)The elevation of the derrick floor above sea level is 3695 ft.

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

On May 10, 1959 a TD of 2781 was reached. The Loco Hills, Me-Tex, Premier, & Lovington sand were found to be dry and non-productive. The 7" and 8 5/8" were pulled. Cement plugs were placed at the following intervals with mud between each:

10 sax @ 2400' @ top of dense zone
10 sax @ 1900' @ top of Queen
10 sax @ 400' above top of salt
5 sax @ surface

A permanent 4" x 4" marker was placed on the surface and location cleaned up. Work completed and location ready for inspection as of May 25, 1959.
I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
