(County or Subdivision)

(State or Territory)

The elevation of the derrick floor above sea level is \_\_\_\_\_ ft.

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

Plan to drill test well to approximately 2,200'. Will set approximately 200' of 8-5/8" surface casing, cementing same with 25 sacks cement.

If oil is encountered, will run approximately 1,650' of 7" casing as production string - cementing same with 50 sacks of cement.

Intend to abide by the rules & regulations of the Department. Sample descriptive log will be furnished.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.

Company YATES BROTHERS
