DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

On April 27, 1958, we ran 405' (15 jts.) of 8 5/8" OD Std. third mixed NS 200' and JS 20' used casing to 491', and cemented with 90 sacks cement and 200' salt.

After standing cemented for 48 hours, we drilled plug, bailed hole down, and re-ran miller.

As shut-off proved complete, drilling was resumed.

Cementing was done by Benton Oil Well Cementing Co.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
