DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

On February 22, 1958 we ran 2609' of 5 1/2" OD 8rd third 14# new JS casing to 2612' and cemented with 100 sac cement preceded by 30 barrels Aquagel.

After allowing to stand cemented for 48 hours, we drilled plug, bailed hole down and re-ran bailer.

As shut-off proved complete drilling was resumed.

Cementing was done by Denton Oil Well Cementing Co.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
