(INDICATE ABOVE BY CHECK MARK NATURE OF REPORT, NOTICE, OR OTHER DATA)

Los Mills, N.M. March 26, 1952

Well No. 6 is located 1650 ft. from S line and 130 ft. from E line of sec. 35

SE NE SE Sec. 35 14-S 29-S N.M.P.M.
(1/4 Sec. and Sec. No.) (Twp.) (Range) (Meridian)
Square Lake 24th New Mexico
(Field) (County or Subdivision) (State or Territory)

The elevation of the derrick floor above sea level is 3671 ft.

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

On March 11, 1952, we ran 478' of 8 5/8" OD Std. 20# used HS casing to 483', and cemented with 50 sacks cement and 200# salt.

After allowing to stand cemented for 48 hours, we drilled plug, bailed hole down, and re-ran bailer.

As shut-off proved complete, drilling was resumed.

Cementing was done by Benton Oil Well Cementing Company.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
