Re: Hollis State #3
SW NW 36-16S-29E.

Dear Sir:

On your C-101 on the above mentioned well you stated you would run 400' of 8 5/8" and circulate cement. 1950' of 7" set and 2700' 4 1/2" with 150 sacks.

On your C-103 you state you ran 462' of 8 5/8" with 50 sacks. You didn't state whether it circulated or not. C-101 stated you would set 7" casing at 1950'. You didn't say anything about pulling it. C-103 stated you did pull it.

On 4 1/2" casing, C-101 was approved for 150 sacks, C-103 states you ran only 50.

When you make any changes in your program after C-101 has been approved, you should get approval from this office.

Yours very truly,

OIL CONSERVATION COMMISSION

M. L. Armstrong,
