The elevation of the derrick floor above sea level is 3856 ft.

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

On May 21, 1958, we ran 2851' of 7" OD 8rd. thrd. 23# JS mixed, used, and new casing to 2853' and cemented with 200 sacks neat cement.

After allowing to stand cemented for 72 hours, we drilled plug, bailed hole down, and re-ran boiler.

As shut-off proved complete, drilling was resumed.

Cementing was done by Denton Oil Well Cementing Company.

RECEIVED
MAY 29 1958

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
