## DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

On May 22, 1958, we ran 2600' of 5 1/2" OD Std. thd. 14# new JS casing to 2610' and cemented with 100 sac neat cement preceded by 60 barrels Aquagel.

After standing cemented 120 hours, we drilled plug, balled hole down, and re-ran bailer.

As shut-off proved complete, drilling was resumed.

Cementing was done by Denton Oil Well Cementing Co.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
