DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

On July 6, 1958, we ran 2862' of 5 1/2" OD Std. thrd. 11 1/2" Bw Casing to 2864' and cemented with 100 sack cement preceded by 50 barrels Aquagel.

After allowing to stand cemented for 72 hours, we drilled plug, bailed hole down, and re-ran bailer.

A₁ shut-off proved complete, drilling was resumed.

Cementing was done by Denton Oil Well Cementing Co.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
