(Range)

(Mendham)

Henshaw Grayburg, West
(Field)

EMG

(County - State)

New Mexico

(State or Territory)

The elevation of the derrick floor above sea level is 3905.5 ft.

DETAILS OF WORK

(State names of all expected depths to objective sands, shoe sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

Authority is requested to temporarily abandon the above captioned well, effective February 1, 1964. This well no longer produces oil in commercial quantities and we are kindly requesting permission to temporarily abandon this well pending possibilities of our participation in a waterflood program for the West Henshaw Grayburg Field. A study is now being made of the waterflood possibilities of this field.

Understand that this plan of work must receive approval in writing by the Geological Survey before operations can be commenced
